

# FINK Plate™

702 and 703

The **FINKPlate™ 702** and **703** cathodic protection test station and telecommunication terminal blocks are an economical upgrade for several configurations of the 2" and 3" diameter **COTTMark®** right of way marker system. Manufactured from high strength thermoplastic alloys, **FINKPlate™** Models **702** and **703** are field proven, maintenance free terminals for monitoring electric currents and potentials as well as housings for surge arrestors, lightning arrestors, shunts, resistors, gas valves, ground bonds, talk terminals, alarm terminals, and pressure monitors. **FINKPlate™** Models **702** and **703** are available from all Cott distributors and are manufactured in our Pittsburgh and Los Angeles factories.
